DETAILED ACTION

1. Claims 1-20, 27-32 have been cancelled by Applicant.
2. For the purposes of this Office Action, the term "forming" is deemed to refer to the shaping of plastic pieces. (See "forming" entry in POLYMER TECHNOLOGY DICTIONARY)

Terminal Disclaimer

1. The terminal disclaimer filed on 4/24/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent issuing from Application No. 10/595,261 has been reviewed and is **NOT** accepted.

The application/patent being disclaimed has been improperly identified since the filing date used to identify the Application being disclaimed is incorrect. The correct filing date is May 18, 2006.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).6

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1773

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 21-26 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of copending Application No. 10/595,261 (allowed).

Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending Application claims a method of forming a multilayer laminate containing at least two layers, each comprising a polylactic acid and a polyester with the recited melting temperature and glass transition temperature (thereby meeting the recitation of a first layer comprising a polylactic acid polymer and a second layer comprising a non-polylactic acid polymer (i.e., a polyester)), wherein at least one layer containing polylactic acid has a crystallinity less than 20%, and wherein the forming takes place above the melting point of the polyester component.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a biodegradable polyester as the polyester component in the films of the copending Application in order to maintain the overall degradability of the laminate. It is conventional to not orient films intended for thermoforming applications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
